There is no other P.W.Division, the work of which can be compared with this Division, which executes - - solely water supply, Drainage, Well Boring and Town Planning Works for the whole State (except water supply to Bangalore Town). Though the Well Boring works are placed under the direct charge of an Assistant Engineer they are under the controlling authority of the Sanitary Engineer, who countersigns the bills after audit by his accounts staff. The total expenditure of the Bureau under all heads, is on an average Rs 7,25,000/- for which there are one Accountant and four accounts clerks and the same number of staff looks after the accounts work of

Posting of two accounts Clerks to the Bureau of Sanitary Engineering

the Mysore P.W. Division, the outlay of which is about the same. But the following are the differences between the regular P.W. Division and the Sanitary Division:—

(a) The former has got Sub Division where there is a separate departmental clerical Agency which audits the initial accounts. There are no sub-Divisions in the Sanitary Division which conducts initial audit.

(b) Sanitary Division has to maintain the individual ledger accounts of the work establishment Provident Fund.

The recent Inspection of the Division showed that the initial accounts are very imperfectly maintained and I would suggest two hands being given temporarily for one year in the fi
—one to clear up the arrears in accounts, such as posting of work registers, verification of materials at site accounts etc., and one hand for the maintenance of work establishment Provident Fund Account and Well boring accounts and the general increase in work due to absence of Sub-Divisions to conduct initial audit.

GENERAL
5 SEP 1936

SIR,

I have the honour to forward herewith a copy of letter No.107 dated 24th August 1936 of the Sanitary Engineer, Bureau of Sanitary Engineering, regarding strengthening of the Accounts staff of the Bureau on account of the large increase of work in recent years, and to request you to be so good as to obtain sanction of Government for posting of two additional Accounts Clerks to the Bureau.

I have the honour to be,
Sir,
Your most obedient servant,

P. Parthasarathy

Director of Health.

Letter No. S.E.107 dated 23/24th August 1[illegible] from the Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore, to the Director of Health in Mysore, Bangalore.

***

Re: Strengthening of the Accounts staff of the Bureau of Sanitary Engineering in consideration of the large increase of work in recent years.

I have the honour to state that when the Water supply and other works were transferred from the Water Supply Division to the Bureau of Sanitary Engineering in July 1932 in accordance with Government Order No. G.7496-519 P.H.69-31-5 dated 19th March 1932, the works transferred were the works connected with the annual maintenance and other works of the Kolar Gold Fields, Vani Vilas Water Works of Mysore, Sri Krishnarajendra Water Works of Shimoga and a few other works such as Chickachannanjappa Chetty Water Works, Kolar &c., and three Accounts Clerks of the Water Supply Division that were looking after the accounts work of the above works were also transferred to the Bureau as ordered by Government. This establishment viz., three Accounts clerks, was then considered adequate to do the accounts work of these works as the works then in hand were only those cited above.

The work of this Division relating to the Town Planning and other works as it stood prior to the bifurcation in July 1932 remains unchanged and the Accounts Staff then attached to the late Town Planning Division consisted of only one Accountant and one Accounts Clerk. Thus after the transfer of works from the Water Supply Division the total strength of the Accounts Establishment consists of one Accountant and four Accounts Clerks one of whom is employed as Cashier. The Accountant besides supervising the work of the Accounts Branch is the general Manager of the office. One Accounts Clerk being solely employed as Cashier as stated above, the

the work of audit of work bills and keeping up of work registers and account has to be managed with the three remaining hands. The work connected with the annual maintenance of the Vani Vilas Water Works and other contribution works of the ~~Vani Vilas Water Works~~ Mysore City Municipality requires the whole time of one Accounts Clerk. One Accounts clerk is looking after the checking of bills and keeping accounts of Kolar Gold Fields Water works and Shimoga Water Works and he is also attending to checking of firms' bills for supplies of materials ordered and got for the various works and the third Accounts clerk is doing the work connected with the compilation of the Divisional monthly accounts and assisting the Accountant in matters connected with the correspondence relating to - Accounts matters in general. The work connected with the accounts of a few other works transferred from Water Supply Division is also being managed with the above staff.

But in recent years, i.e., subsequent to bifurcation of works in July 1932, the Water Supply and drainage works in the State have very largely developed so much so that almost every municipality in the State is desirous of having water and drainage facilities and in recent years a very large number of major works are sanctioned, some of the most important of which are the water supply works of Madhugiri, Dodballapur, Malur, Frenchrocks, Seringapatam, Chennapatna, Holenarsipur, Konanur, Arsikere, Tiptur, Davanagere, Chickmagalur, Chitaldrug, Chintamani, Ganjam, Closepet and Mandya, the underground drainage schemes of the Bangalore City municipality and the drainage schemes of Chamarajanagar, Goribidnur, Tarikere, Kalasa, Magadi, Arsikere, Kolar and many other works too numerous to mention here and all these are major works requiring the work accounts being kept in detail. Some of these works are of course completed, some are nearing completion and some are put in hand and are in progress and there is prospect of many more works being

being sanctioned and taken up for execution.

Besides, this Department has in recent years undertaken the maintenance works of the water supplies of Dodballapur, Chennapatna, Frenchrocks, Seringapatam, Chitaldrug, Holenarsipur, Konanur, Andersonpet and Robertsonpet, Satnur etc., and the accounts of these works have also to be maintained.

Except in respect of Kolar Gold Fields Water Works and Vani Vilas Water Works, all other works are directly in charge of the Assistant Engineers who are attached to this office and there being no sub division attached to this Division in respect of the large number of works in charge of the three Assistant Engineers, the initial accounts work connected with the checking of measurement books etc., of works has to be got done in the Accounts Branch alone, whereas if there were sub divisions, the work of checking the calculations of measurements in measurement books is restricted to the case of final bills alone.

In this connection, I have to state that a scheme of Provident Fund for the water supply work establishment of the K.G.F. and Vani Vilas Water Works having been sanctioned by Government, this office has been asked to maintain the ledger accounts relating to the subscribers to this Provident Fund scheme. There are something like 200 employees in the K.G.F. and Vani Vilas Water Works and as many ledger accounts have to be maintained. This is also an additional work thrown on this Establishment, and the Comptroller is urging for completion of the posting of these ledger accounts of the subscribers to this Fund, and though this work has been partly done, it is feared that it cannot be completed unless an extra hand is posted for this work.

Besides, the Well Boring Section that had been attached in previous years to the Department of Industries and Commerce was added on to this Department in January 1935 and this has also contributed to the increase of work of the Accounts Branch.

From the above, it may easily be imagined to what a large extent, the work of the Accounts Branch has gradually increased in recent years, and as pointed out in para 1 above, the accounts staff transferred from the Water Supply Division in July 1932 was of course proportionate to the works then in hand. But as the work in the Accounts Branch has in recent years been very greatly on the increase, it has been found impossible to efficiently manage the work of audit of works bills and maintenance of the works accounts of the various major works with the present limited number of Accounts Clerks. In my opinion, two more Accounts clerks are absolutely necessary for attending to the work accounts of the large number of works.

The operation of this Department consists of a large number of contribution works relating to the various municipalities of the State and we are recovering from these local bodies the sanctioned percentage towards the establishment and tools and plant charges and due to the very large number of works taken up for execution, the amounts recovered in the shape of establishment charges is considerably large, the amount recovered on this account during the year 1935-36 being Rs.67,174/- against the budget provision of Rs.54,731/- for the total establishment of the Bureau and hence the cost of the small additional strength required is considerably very little as compared with the large amount recovered from the local bodies.

Under the foregoing circumstances, I request that necessary sanction for posting of two more Accounts Clerks to this Division may kindly be obtained as early as possible.
